

ARTEM KHOMICH

SOFTWARE ENGINEER

2373 Bloor St. W., Toronto, ON M6S 1P6

(438) 838-3214

khomich.art@gmail.com

Software engineer with a focus on performance, security, and distributed systems. Delivered scalable solutions and automation in high-throughput environments. Known for pragmatic problem-solving, ownership mindset, and continuous improvement.

SKILLS

- **Programming Languages:** Go, TypeScript, SQL, Python, C#
- **Cloud Platforms:** AWS (ECS, ECR, Lambda, SQS, Cognito, CloudFormation), Azure AD
- **DevOps & CI/CD:** Docker, Kubernetes, GitHub Actions, GitLab CI, Jenkins
- **Observability & Incident Management:** Instana, CloudWatch, Slack alerting
- **Databases:** MS SQL Server, PostgreSQL, OpenSearch
- **Tools:** Git, Postman
- **Security:** RBAC, Access Control, OAuth

EXPERIENCE

08/2024 – Present

Software Engineer II, Mimecast | Mississauga, ON

- Built two major features in Go and Angular to expose hidden detection stages and enable real-time (<1s) threat update delivery in a low-latency distributed system.
- Delivered a data recovery tool in 2 days, preventing loss for 58,000+ users during an incident; later adopted into Mimecast's internal SaaS resilience tooling.
- Maintained and debugged microservices (Go, TypeScript, Python, Java) handling millions of requests in a high-throughput AWS infrastructure (ECS, Lambda, SQS), improving system performance, latency, and observability.
- Collaborated with product managers, performed code reviews, and led continuous refactoring and optimization efforts with a secure-by-default mindset.

10/2022 – 07/2024

Software Engineer, Northern Labs | Toronto, ON

- Ported two Elixir services to Go and built three scalable microservices handling 100k+ daily requests in a distributed architecture.
- Designed and implemented a PostgreSQL failover strategy (99.9% uptime), improving infrastructure reliability and availability.
- Led integration with external currency and wallet providers, ensuring secure handling of sensitive data and maintaining compliance in a SaaS environment.
- Introduced Browserstack-powered E2E testing with automation and asynchronous validations to reduce regressions and support reliable deployments.

06/2021 – 10/2022

Software Developer, Risk Control Technologies | Toronto, ON

- Migrated legacy .NET apps to Azure App Service and containerized CI/CD pipelines with Docker, scripting deployments using Bicep and PowerShell.
- Implemented Azure AD authentication and RBAC across 5 services (.NET Framework, .NET Core, Angular) to enforce access control and identity management.
- Built and maintained RESTful APIs and Azure Functions processing over 2M weekly requests, with a focus on throughput optimization, resilience, and performance tuning for payment workflows.

09/2019 – 06/2021

Software Engineer, Acumatica | Montreal, ON

- Built core components of the BigCommerce and Shopify integration with Acumatica ERP, including a US state tax conversion algorithm and a centralized logging system that reduced bug resolution time by 50%.
- Diagnosed and resolved performance issues using Kibana and ERP diagnostics, maintaining consistent service levels across customer environments.
- Participated in technical meetings with partners and internal teams to align on customer requirements, system architecture, and roadmap planning.

06/2017 – 08/2019

Consultant, International Civil Aviation Organization (ICAO) | Montreal, QC

- Led development of internal business projects using .NET Framework, Entity Framework, and jQuery, including a portal connecting states and aviation certification stakeholders.
- Built a single-page Vue application to modernize the portal UI and improve system performance and usability for international users.

09/2016 to 05/2017

Research Assistant, CONCORDIA UNIVERSITY | Montreal, QC

- Developed a new portal for tracking and managing educational activities for faculty and students using .Net Core 2.0.

09/2015 to 05/2016

Web developer, LAVKIN WEB STUDIO | Saint Petersburg, Russia

- Developed tailored IT solutions, performed HTML/CSS coding.

04/2015 to 09/2015

Server Engineer, CONSULT-MIT, LLC | Saint Petersburg, Russia

- Provided technical support to server infrastructure and client support.

EDUCATION

2016 to 2019

Bachelor of Science | Computer Science, Concordia University, Montreal

- Specialization in Web Development and Computer Graphics

2010 to 2014

Bachelor of Science | Information Security, Complex Protection of Information Management Systems, STATE UNIVERSITY OF AEROSPACE INSTRUMENTATION, Saint-Petersburg, Russia
